

EXPERIMENT – 7

Design Evaluation of App Layouts and Colour Schemes using GIMP

Aim:

To design multiple app layouts with different colour schemes and evaluate user feedback based on aesthetics and usability using GIMP.

Objective:

- To create mobile UI layouts using GIMP
- To experiment with different colour schemes
- To analyze user feedback for design improvement

Tools Used:

- GIMP (GNU Image Manipulation Program)
- Google Forms (for collecting user feedback)

Procedure:

Step 1: Install GIMP

- Downloaded and installed GIMP from the official website

Step 2: Create a New Project

- Opened GIMP
- Set canvas size to **1080 × 1920 pixels** (mobile screen resolution)

Step 3: Base Layout Design

1. Divide Sections:

- Used Rectangle Select Tool to create:
 - Header
 - Content area
 - Footer
- Applied base colors using Bucket Fill Tool

2. Add UI Elements:

- Used Text Tool for:
 - Titles
 - Buttons
 - Labels
- Used Shape Tools for:
 - Buttons
 - Input fields
 - Image placeholders

3. Layer Organization:

- Created separate layers for each component:
 - Header
 - Login Button
 - Title Text
 - Email Input Field

Step 4: Create Colour Variants

1. Duplicate Layouts:

- Duplicated the design to create multiple versions
- Applied different colour schemes using:
 - Colorize Tool
 - Bucket Fill Tool

2. Save Layouts:

- Exported designs as:
 - Layout1.png
 - Layout2.png
 - Layout3.png

Step 5: Collecting User Feedback

- Shared all layouts with users via Google Forms
- Asked users to evaluate based on:
 - Visual appeal
 - Usability
 - Readability
 - Colour preference

User Feedback Analysis:

Layout 1:

- Simple and minimal design
- Suggestions:
 - Improve colour contrast
 - Enhance button styling (shadows/depth)

Layout 2:

- Good colour usage and hierarchy
- Issues:
 - Background cluttered
 - Tight spacing between elements

Layout 3:

- Clean and professional design
- Features:
 - Consistent spacing
 - Balanced colour scheme
- Suggestion:
 - Option for theme customization

Final Recommendation:

- **Preferred Layout: Layout 3**

Reason:

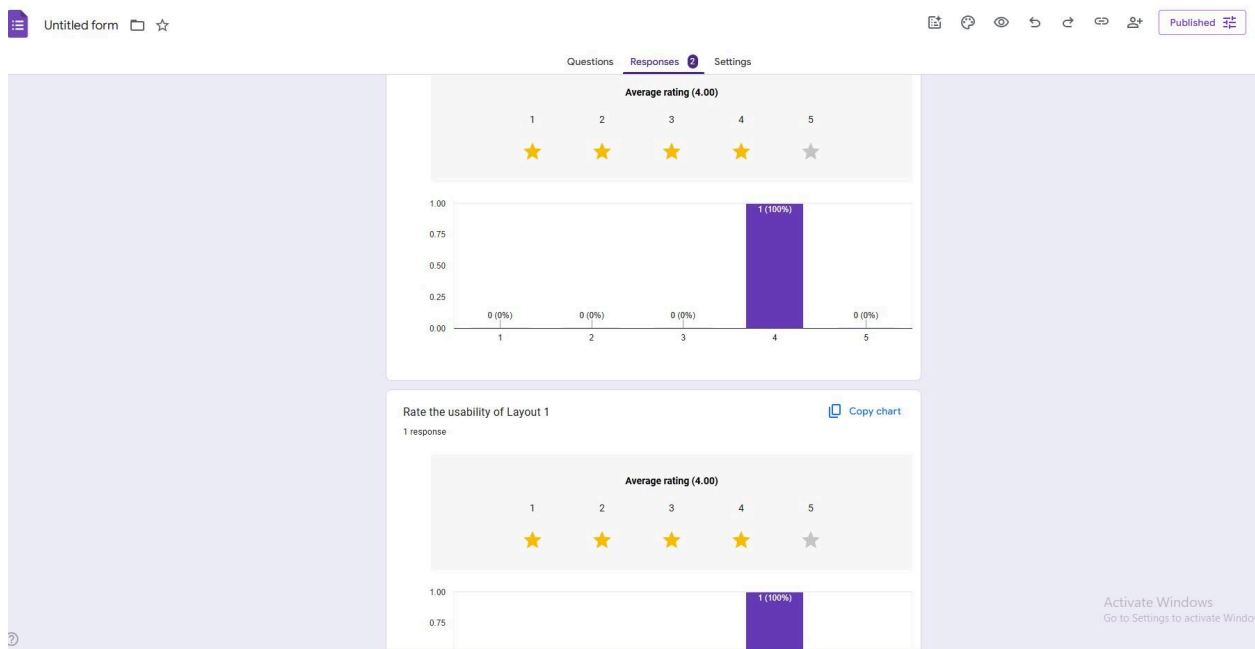

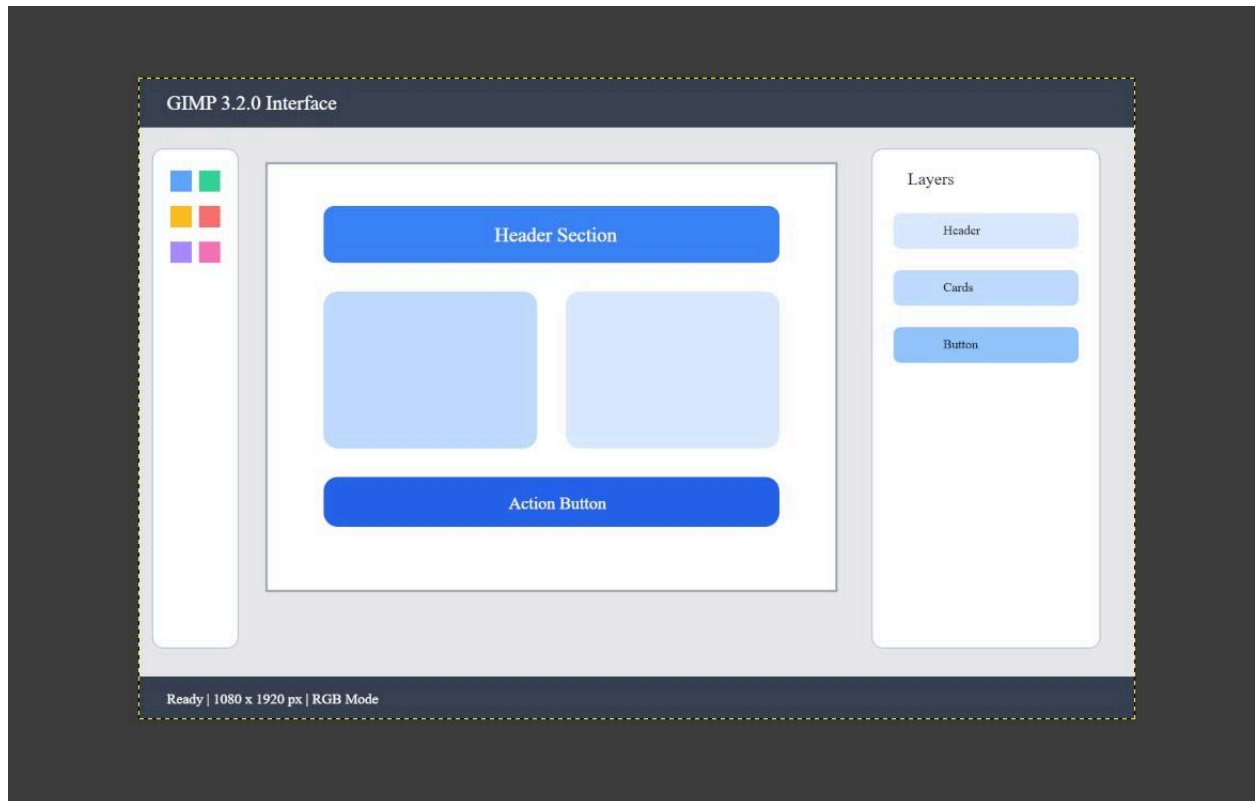

- Modern and clean design
- High usability
- Balanced and appealing colours
- Received the best user feedback

Step 6: Iteration and Refinement

- Improved design based on feedback
- Adjusted layout and colours
- Conducted final testing to ensure usability and aesthetic quality

Result:

Successfully designed and evaluated multiple UI layouts using GIMP. Based on user feedback, an optimal layout (Layout 3) was selected, ensuring better usability and visual appeal.
