

EXPERIMENT-8

AIM

To design a storyboard representing the user flow for a mobile **Food Delivery Application** using Balsamiq Wireframes, focusing on simple UI structure and user interaction.

TOOL USED

- Balsamiq Wireframes (<https://balsamiq.com>)

PROCEDURE

1. Open Balsamiq Wireframes and create a new project.
2. Select mobile screen templates (iPhone/Android size).
3. Design multiple screens representing the food ordering process.
4. Use UI components like:
 - Buttons
 - Text fields
 - Images
 - Icons
 - Lists
5. Arrange screens to show complete user flow from browsing to order confirmation.

USER FLOW (Food Delivery App)

1. Home Screen
2. Restaurant List Screen
3. Food Menu Screen
4. Food Details Screen
5. Cart / Checkout Screen
6. Order Confirmation Screen

SCREEN-WISE DESIGN (Balsamiq Layout)

1. Home Screen

Components to add in Balsamiq:

- Search Bar (Text Input)
- Banner (Image placeholder)
- Category Buttons (Veg, Non-Veg, Fast Food, etc.)
- Restaurant Cards (Image + Name + Rating)

Purpose:

Starting screen to explore food options.

2. Restaurant List Screen

Components:

- List View
- Restaurant Image
- Name
- Rating ★
- “View Menu” Button

Purpose:

Displays available restaurants.

3. Food Menu Screen

Components:

- List of food items

- Food Name
- Price
- “Add to Cart” Button

Example items:

- Pizza
- Burger
- Pasta

Purpose:

Allows users to select food items.

4. Food Details Screen

Components:

- Food Image
- Title
- Price
- Description
- Quantity Selector
- “Add to Cart” Button

Purpose:

Provides detailed info before ordering.

5. Cart / Checkout Screen

Components:

- Selected Items List
- Total Price
- Address Input Field
- “Proceed to Payment” Button

Purpose:

Review order and enter delivery details.

6. Order Confirmation Screen

Components:

- Payment Options (Radio Buttons: UPI, Card, COD)
- Order Summary
- “Confirm Order” Button
- Success Message:
👉 *“Your order will be delivered in 30 minutes!”*

Purpose:

Final step confirming the order.

FEATURES

- Simple and easy-to-understand layout
- Clear navigation between screens
- Organized user flow
- Uses standard UI components
- Focus on usability over visuals

DRAWBACKS

- Limited visual design (black & white wireframes)
- No real interaction or animations
- Not suitable for final UI design
- Only represents structure, not actual UI experience

RESULT

Successfully designed a Food Delivery App UI storyboard using Balsamiq Wireframes, demonstrating the complete user journey from browsing food to placing an order.
